	APPROVAL OF STATE ENGINEER	
This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:		
This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. It is further understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. The well shall be equipped with a 2-inch opening for measuring depth to water. If well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times but does not take responsibility for the use of the Federal range.  This Permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.  The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal, and local agencies.		
	·	
The	amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and	
not t	o exceed 0.0156 cubic feet per second . Or sufficient water to	
wat	er 500 head of cattle.	
Actu	al construction work shall begin on or before	
Proc	of of commencement of work shall be filed before	
	k must be prosecuted with reasonable diligence and be completed on or before February 10, 1984
